

Why choose Kinetech™ Woven stretch fabric for sports apparel?

Vs.

- ✓ **Best stretch value** (thanks to the orthogonal placement of yarns):
 - More modulus force – enhanced compression
 - Better recovery after maximum stretch
 - Better consistency over time – garment feel as new after many use
- ✓ **Lighter weight:** Kinetech fabrics are light but very powerful - second skin effect -
- ✓ **Best cover factor for weight:**
 - A woven fabric of 130gr/sm cover athlete's body as a 200gr/sm knitted fabric
- ✓ **Best Hydrodynamic:** Thanks to the smooth and compact surface, Kinetech™ woven fabrics have better water glide. Woven fabrics are used by almost any winner of swimming World and Olympic medals
- ✓ **Best water repellency:** thanks to the patented Lot'o'dry™ treatment and the combination of the compact textile structure it assured optimum water repellency values.
- ✓ **Best Aerodynamic:** Kinetech™ lab wind tunnel tests, prove a higher efficiency for speed range from 36km/h to 120 km/h
